

SKYRA PROFESSIONAL
TABLEWARE

THE NEW WAY TO BUFFET

Hello!

We are excited to welcome you to the Skyra Professional - New Way to Buffet Catalogue 2016. It is bursting with our passion for food presentation and our capabilities in engineering and innovation.

Skyra Professional Tableware proposes products that transform foodservice to the next level. We help the food look better, smell better and taste better. Our mission is to offer Tableware that enhances the entire dining experience.

To be honest, we are just a bunch of foodies. And we are certainly not good cooks. That is why we really, really appreciate the great chefs of the world. So, we have made it our life aim to be their little elves. Our purpose to exist is to support them in their life endeavor. To help chefs serve delicious dishes. And to enable the diners of the world to eat tastier food.

We have built an ecosystem where the professional food preparation can be enhanced with our product portfolio and sustained over an extended period of time. We believe that we can happily exist if we continue doing what we are so passionate about – to hone our 58 year old heritage of experience and skills in metalworking, and engineer a better dining experience for as many people.

*Warm regards,
Raghav Khosla
Founder, Skyra Professional Tableware*

Product Care 152

PERFECTION IS NOT ATTAINABLE, BUT IF WE CHASE

PERFECTION WE CAN CATCH EXCELLENCE - *Vince Lombardi*

1958

Mr. Rajinder Paul Khosla establishes an Electroplating Unit in the small town of Moradabad, India

1991

Launch of showroom in New York's 5th Avenue

2005

Stainless Steel Tableware manufacturing center opened in New Delhi, India

2016

Launch of Skyra Stock Catalog with 5 Partner Brands

1965

First exports sale for Silver giftware articles

2013

Launch of Skyra Professional Tableware Brand

58 Years of Original Equipment Manufacturing for the finest tableware brands across the world. This half-decade old heritage has given us the necessary understanding and capabilities of making the highest quality products.

ENGINEERING

CNC Tooling for precision engineering dies and moulds in record times. The foundation of any good quality product including our Dobbelt Double Wall Platter - designed by Hiromichi Konno and instated in the Museum of Modern Art (MoMA) New York.

RAW MATERIAL

Using only virgin 304 imported Stainless Steel sheets. The FDA approved Raw Material of the highest grade Stainless Steel is far superior than the rest of the Indian manufacturing industry.

INNOVATION

Skyra's state of art CNC Laser Technology enables us to manufacture the most radical and beautiful designs of the world in the absolute best finish. Whether it is patterns or joints, our laser machines create the finest.

MANUFACTURING

Skyra's pressing units has some of the largest presses in the Industry. From Gastronom Pans to Big and Deep tubs, this is the enabler for our show stoppers.

FINISHING

CERAMIC COATING

The high-gloss Enamel coating on the Rainbow Skyra collection is now done in Ceramic.

Ceramic resin is much harder than enamel and also resistant to vinegar and other acidic foods.

POWDER COATING

A spray and bake cost-efficient process

SOFT TOUCH

SILICON COATING

The special Silicone coating is a very high-end finishing technique that is also an insulator and beautiful to touch.

PVD COATING

Copper, Gold, Titanium and other metallic high quality finishes

ELECTROPLATING

A electro-chemical dipping and baking process for Silver coatings

SHOT BLASTING

A spray process in a special protective chamber

QUALITY

Skyra prides itself in having the absolute top quality for tableware products in the world. Not only is Skyra brand of the highest quality, but Skyra is also the manufacturer of several of the largest global high-end brands.

SKYRA EXCLUSIVE PARTNERS

For the first time in 2016, we are presenting our exclusive brand partners for the Indian market. Skyra has carefully surveyed the global industry landscape and chosen 6 brands and a limited product selection that perfectly complement Skyra's design, innovation, quality and value philosophy.

SKYRA
ORIGINAL
DESIGN

Skyra is in the business of something new and something different. Unlike other manufacturers that have established a brand by dumping their export OEM products into their branded catalog, Skyra actually creates custom innovations for the Foodservice market. It took 3 years to formulate and execute our design strategy, which is as unique to Skyra as its products. Each year, the designers at Skyra meet with a panel of top Chefs, F&B Directors and Caterers in India to discuss gaps in the Indian Tableware market.

The designers then innovate designs around these issues and fine-tune them along with the panel and our in-house engineers. The engineers and production team create prototypes, re-tune and finally launch over a 100 new products each year. The products are designed to meet solutions in the areas of Food Presentation, Warming, Front-house Cooking, Serving as well as Storage.

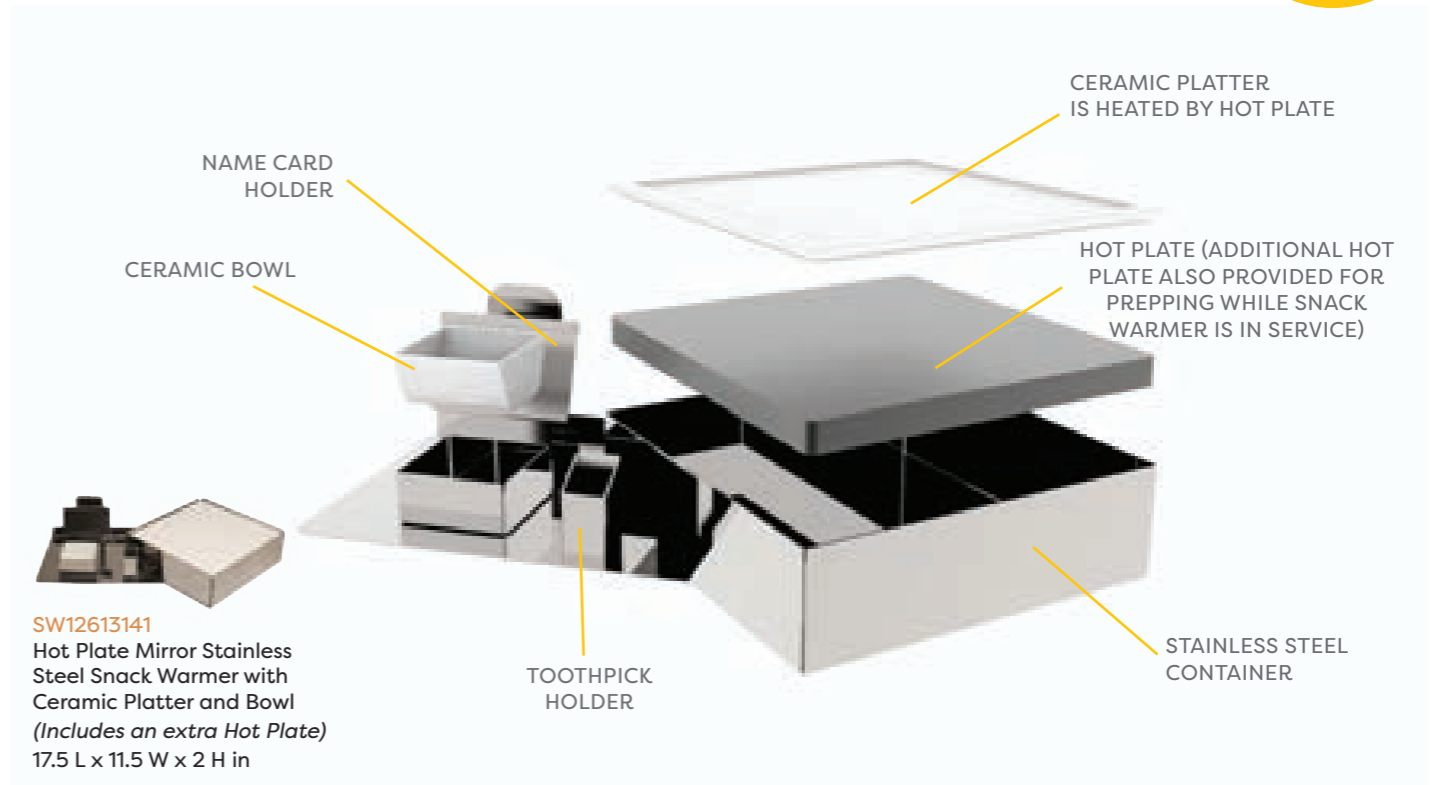

SKYRA HOT PLATE SNACK WARMER COLLECTION

A revolution in pass around platters. The Hot Plate Snack Warmers incorporate a light-weight hot plate with non-stick coating that can be heated in the oven prior to service. The flameless food warming technology is especially great for indoor banquets that prefer to avoid open flame heat sources.

SKYRA MINIBYTES SNACK WARMER COLLECTION

Well plated and garnished single servings are changing the face of food service. Skyra has taken the trend one step further and incorporated it into Snack Servers. And then taken it another step further and created a mechanism to warm them. That's two giant leaps to wow your guests.

SKYRA STICKY BLOCKS RISER COLLECTION

The Sticky Block is a star product in the Skyra portfolio. It is one of those simple designs that leaves one wondering "Why didn't I think of that"! Made specifically to simplify operations, sticky block risers were conceived due to a challenge faced by a local celebrity chef - "I want elevations that are absolutely straight forward, modular and so simple to use that my ground staff will not require any training." Bricks and Lego blocks are something that every child and adult are familiar with; these foundations have been smartly converted into sleek and elegant tools for food display. These modular blocks have magnets inside and stick to one another to create a very stable and flexible pillar.

All risers are collapsible and stackable

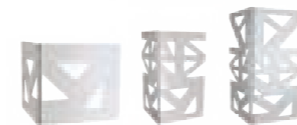

Risers can be connected at different heights to create a tiered buffet presentation

SKYRA FAT FREE BUFFET COLLECTION

The buffet station has interchangeable tops that enable it to transform from a chafing dish to a live cooking station or cold station. Although all 3 types of buffet stations are necessary for any banquet operation, now the outlet does not have to stock hundreds of each. The idea is to have multiple tops for every base, so that just in case the menu demands more live cooking stations on a particular day, it is not a problem.

TWO-SIDED BUFFET

X-Risers can be connected with platforms to create a double-sided buffet setup at three height levels

SKYRA SKYSERV INDUCTION COLLECTION

This is the chafing dish alternative that everybody has been waiting for. The line consists of round, oval and rectangular dutch ovens, serving pans and tagines. The Skyserv technology uses tri-bonded technology, a special kind of stainless steel raw material with aluminum at it's core. The tri-bonded material enables the Skyserv pots to be induction friendly, food safe and heat evenly, so as to effectively eliminate the water pan.

SKYRA CRATE BUFFET STATION

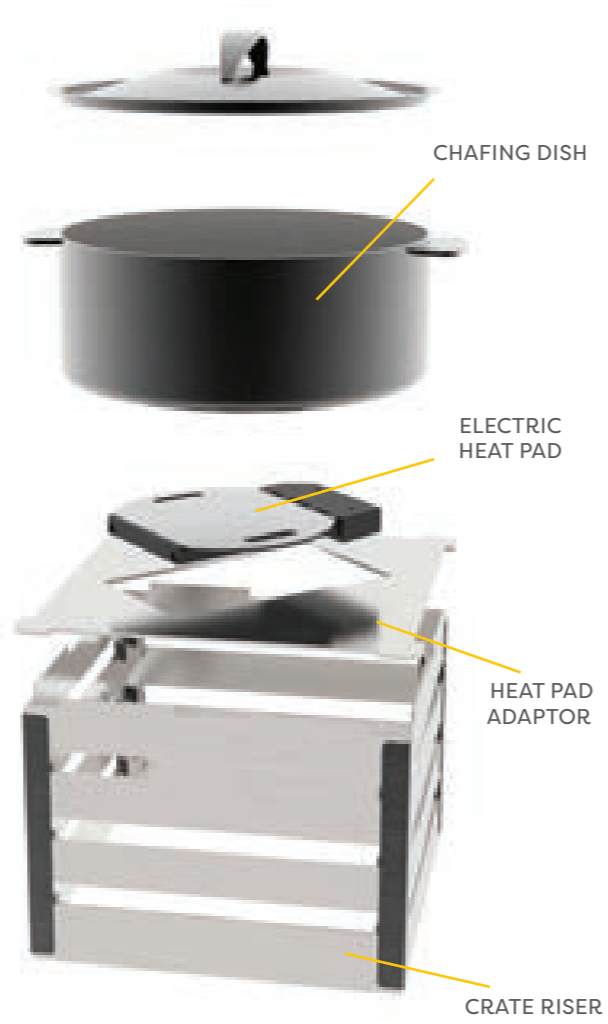

The farm to table trend is a popular style that is working very well at the moment. Nothing says farm to table better than crates and pots & pans together. Skyra has created an incredible twist to the tale: designed specifically for professional front of the house serving, is the Skyra Crate Buffet System. The Skyra Crate Risers are intelligent food warmers that provide elevation with a warming mechanism. Put a Skyserv pot on top of it and it is a beautiful anti-chafer. The Skyra Buffet System is a modular concept that can become a chafing dish, live cooking station or a cold station as required. Simply change the tops and the fuel source and it is instantly transformed.

SKYRA ORIGINAL DESIGN

SKYRA INDUSTRIAL CHIC COLLECTION

The Industrial Chic style is on trend and Skyra has released an extensive line of items that perfectly capture the beauty of this aesthetic. The Industrial Burners are powered by chafing fuels and work very well with the Skyserv Collection. The wire baskets and aluminum trays are great tools to really drive that industrial feel into your presentation.

FOR USE IN ONE OR TWO-SIDED BUFFETS

A concealed slip tray holds the chafing fuel so neither is seen during service

SKYRA MASALA COLLECTION

The Masala Collection is named so because it a mixture of modern clean shapes and traditional finish. The Spherical domes, Fluidic edges and Straight line forms define the modern character of the items. In the Hammered Copper exterior, the fusion is trendy and exciting. The Masala Collection consists of Chafing Dishes, Live Cooking Station, Coffee Urns, Risers, Bowls and Platters.

SKYRA CHINA TOWN COLLECTION

The concept of the China Town collection is to break away from commercial Chafing Dishes, and present and serve food in buffet stations that are in the theme of the decor and cuisine. Whether the service is in a Pan Asian setting or simply serving Chinese food, the China Town collection will surely enhance the guest experience to another level.

SKYRA MARRAKECH COLLECTION

The Marrakech series is a farm to table collection. Our burnt copper finish has been developed in-house to answer requirements for a rustic collection. It is a copper-plated collection with a special hand application to distress the look and give it this proprietary burnt finish.

SKYRA DOBBELT BOWL COLLECTION

Dobbelt in Danish means 'double'. It accurately describes our minimalistic Scandinavian Double Wall Bowl Collection. The Double Wall allows for insulation when filled with hot food and prevents sweating in cold stations. It also helps keep food warmer for extended periods. The thick walled sleek designs are superbly finished and look beautiful in any setting.

DALEBROOK MELAMINE COLLECTION

Dalebrook is the exclusive melamine accessories partner of Skyra in India. Dalebrook United Kingdom is the first company to bring melamine food display products to the catering industry in the 1980's. They soon began designing new products and selling their products further and further afield. Dalebrook is currently available in over 70 countries worldwide. Advancements in technology enabled Dalebrook to create more complex designs and gave them the ability to customise products and offer bespoke display solutions to customers.

SKYRA LOTUS SERVERS

The Lotus platter is possibly the most complex product we have ever made. It has been created to cater to the growing trend of single servings. The Lotus platter represents India's national flower, with a dozen petals for plating bite-sized portions and a dip bowl in the center. It can be used for table settings, as a center piece, or as a pass around platter.

PRODUCT CARE: ELECTROPLATED PRODUCTS

Skyra Professional Tableware has a 57 year old heritage in Electroplating finishes. It continues to lead the industry by consistently upgrading and aligning with the latest technological advancements. Skyra products are guaranteed to have the absolute highest quality in Stainless Steel based electroplating finishes.

Electroplating is as delicate as it is beautiful and should be handled with great care. Below are a few tips on how to take care of your new products.

PRODUCT CARE INSTRUCTIONS

- 1. Hand-wash the product with warm water only, after every use.*
- 2. Ensure to completely dry the product with a soft cloth after each wash.*
- 3. Cover the product in polythene (saran) wrap or cotton and store in a cool dark place. Do so only after it is completely dried.*
- 4. When the product is displaying signs of tarnish, rub with a metal polish compound and soft cloth. Silvo and Brasso are two commonly available polishing compound brands.*
- 5. For maximum shine, Buff the products with a high speed polishing machine. Using a soft 'Airflow mop Flannel Wheel' and standard Red Bar and Green Bar buffing polish compound, apply light pressure in 'color motion'. A sample of an appropriate Buff wheel can be requested from Skyra for reference.*

'DO NOT' INSTRUCTIONS

- 1. Do not allow the electroplated surface to be in direct contact with foods (foods with ingredients) that are acidic in nature such as Vinegar and Lime. Stainless Steel food pans and liners are provided in each product to hold these types of fares.*
- 2. Do not use the product over Direct Heat/ Flame. In the case of Chafing Dishes, ensure that water is always filled in the Water Pan before placing the Chafing Fuel underneath it.*
- 3. Electroplated products are not developed for cooking. They should only be used for Front house serving.*
- 4. Do not scrub the Electroplated surface with an abrasive sponge.*
- 5. Do not use industrial detergent on the Electroplated surfaces or put into a Dish Washer.*
- 6. Do not leave the product wet as permanent water marks may stain the surface.*
- 7. Do not use Cotton Wheels with grit specification to buff the electroplated surface. If in doubt, cross-check with your Skyra relationship manager.*
- 8. Do not leave the product wet as permanent water marks may stain the surface.*
- 9. Do not use Cotton Wheels with grit specification to buff the electroplated surface. If in doubt, cross-check with your Skyra relationship manager.*

ELECTROPLATING OVERVIEW

Electroplating is an electro-chemical process through which a thin layer (up to 10 microns) of Gold, Silver, Copper, Brass, Nickel, Chrome and other metals are applied onto a Stainless Steel surface.

Most of these metals are known to react to moist air and oxidize over a period of time. The black film that is created on the topmost layer of the metal as a result of oxidization is known as 'Tarnishing', and is not a manufacturing defect. Tarnishing is a natural process that can be removed with the help of rubbing polish compounds, either manually or with a polishing machine.

Over a period of time, depending upon the level of usage and re-polishing, the layers of electroplating will consistently be grazed until the Stainless Steel base material is visible. At this stage, Skyra offers re-electroplating services to restore the finish to its original condition.

Please do not hesitate to contact your relationship manager for any further understanding or troubleshooting with your Skyra items. We hope you have a great product experience.

PRODUCT CARE: ACRYLIC PRODUCTS

Dubbed the diamond of plastics, acrylic has outstanding optical properties, including its exceptional clarity. It is eight-times more transparent than glass and will not yellow under normal exposure.

Acrylic has many advantages over glass: it is half the weight of glass; chips nominally - in the case of a chip, sand it out with a nail file or a piece of sand paper (unlike glass in which you would have to throw it out). And probably the most impressive characteristic: It is ten times more resistant to impact, which, in the hospitality industry, makes for a most cost-efficient product.

Acrylic can be safely used in temperatures that range from minus 40 to 140 positive degrees Fahrenheit. Together these qualities make acrylic the perfect material for your food, cocktail, or simply, decorative display.

TO CLEAN: Hand-wash with soap and water, or, if food wasn't directly on the platter, just wipe down with a damp cloth. DO NOT use any abrasives cleaners, window cleaning sprays and solvents such as acetone, ammonia, and chlorinated solvents. These solvents will cause your platter to 'cloud' up.

Because they are not cutting boards, platters will only incur topical scratches. If after a year or two you want to refurbish them, dab a bit of toothpaste on the surface, add some water, and rub with a soft cloth and a bit of muscle in a circular motion. For a fast polish, use a buffing wheel also in a circular motion. This is done very easily with a buffer adapter that attaches to a power drill. Among the many positive traits acrylic has to offer, this is one of its' best attributes: These platters refurbishes very easily.

Some of our pieces may present sharp edges due to design features. For your safety, please use caution when handling— especially around children.

If a ball accidentally gets knocked off, use crazy glue on the base of the ball then place it back where it was originally and let it sit over night to dry. It works like a dream.

If you are using UltimateSpread platters elevated by Risers and you want to prevent them from sliding around, use the double-sided tape it comes with or place little squares of saran wrap (cling wrap) on top of the Risers and then place the platter on top of that. This will ensure your platter is secure.

For storing, we recommend cordoning off a special place for the Ultimate Spread Collection and stack with foam or cloth in between, or purchase custom sleeves for storing.

Even though one might see a tiny spec or minute bubble inside a platter, Skyra has only the highest standard of quality control and will not ship anything that doesn't meet our criteria. Each piece is manually inspected to ensure excellent craftsmanship and your ultimate satisfaction.
